

**TESTIMONY: KEMIS RODGERS** I have suffered with sarcoidosis for 35 years, but it has not really bothered me until fairly recently, when it became harder and harder to breathe. Many people get over this disease easily because it goes away by itself. About 5% of us have complications, which cause other difficulties and even death. In my case it has caused fibrosis (scar tissue) of the lungs, which is intertwined with my air passages, and breathing has become extremely difficult. In spite of not wanting to do so, I was forced to go on prednisone in order to stay alive. I gained 45 pounds, but my breathing came easier so, with the help of 24 hour oxygen, I was able to get around. However, I was very feeble, could only walk a very short distance, like from the house to the car, and could not lift, or bend over or do chores. It resulted in great shortness of breath just to get dressed. I was extremely weak, could not read out loud and lost all interest in doing what I loved most (watercolor painting). Everything was an effort.

Then a friend introduced me to VIBE. She explained that it is super nutrition that goes immediately to the cell, bypassing digestion, so it delivers about 90% of what is ingested and works quickly. The first day I took 1 ounce of VIBE and noticed I had very little heartburn (which was unusual for me). On the second day, I had none at all. WOW! I was so encouraged by this that on the third day I took 2 ounces. My heartburn never came back and on day 8 of being on the VIBE I awoke in the morning with a burst of energy and renewed strength. My depression was gone. Now, I had not been able to walk farther than from the car to my kitchen, and that was an effort. Suddenly I was able to breathe better, work with less effort, and best of all I could walk better and longer. That day I walked ¼ of a mile, which I had not been able to do for at least three years! No one could believe it. My husband came outside and could not find me. He thought I must have fallen or something, but I had walked up our steep driveway and down the road. He was absolutely astonished.

I continue to have the energy to do most of my chores My weakness is all gone. Fatigue has not been a problem since beginning the VIBE.

When I went to my doctor the next time she kept saying "Is this the same woman?" She noted that my complexion was rosier and of course, was surprised at how well I was doing. In fact, she called all of the office help out to look at me, since they were aware of how I had been previously. The doctor is now recommending VIBE.

VIBE is an adaptagen and goes into the cell by osmosis because it is 4 times smaller than the cell. It travels first to what the body needs most. They say that the longer you use it, the better it gets, and after what I have experienced, I believe it. This concentration of everything your body needs helps our cells repair. It is the latest technological discovery to make up the health deficit left by depleted soils and processed food in our diet.

## Autism

Hello, my name is Tanya Eckert. I have some wonderful news about our product and someone very special to me. My 5 yr old son Dustin.

Dustin was diagnosed with Autism when he was 2 years old. Very bright in many area's. But on the Doctors chart he was scored at being only 12-18 months, until he was almost 4, the last time he was checked or "scored". Ok I'm getting ahead of myself. Dusty was unable to speak at 2 yrs old, at 3 years he only babbled as a 8-12 month old baby, just before he turned 4 he started talking a little. But mostly you could not understand him, unless you were with him a lot. He learned to use basic sign language for his needs to be met.

Recently I have started him on the adult VIBE and what a difference! He talks so you can understand almost everything he says. He is talking in complete phrases and they are in context to what is being said or what's going on. He has also been reading books and everything he see's. He is sleeping better, using more eye contact and he is now very affectionate (which he NEVER was). Now he will come up to me, all on his own and say "Mommy I love you" and gives me a hug. You have no Idea how long I have prayed and waited for this day to come, to hear those words from my little man.

His teachers, my parents, family and friends have all noticed the difference in him. He has only been taking the VIBE for 2 weeks and the difference is unbelievable! I cant wait to see what happens in a month or two.

I have seen the difference this product makes right here at home and heard of many more wonderful differences it has made at homes around the states.

This product (VIBE) is wonderful and as far as I am concerned Heaven sent, I would love for everyone who has the chance to try this product, to try it and see the difference it can make in your life too!!!

I'm very Proud,  
Thank you,  
Tanya

## **Stomach Cancer - Wayne N**

I was diagnosed with stage four stomach cancer in June of 2004. I have always been one to explore and use the nutritional path for health and have outlived the 6-9 month life expectancy given to me upon diagnosis. I guess you could say it's ironic that I would be diagnosed with this catastrophic illness with my belief in natural remedies. It seems that over the years such things as addiction to latte's & espressos, coupled with my eating lifestyle produced a very acidic environment internally.

I was very reluctant to go the radiation and chemo route. However, I found I was losing the battle with cancer and started radiation still hoping I could beat this by natural remedies. As a last resort I agreed to Chemo when my lymph system shut down completely, flooding my organ areas with excess fluids. Between not eating and the chemo, I was so weak I had to be wheeled on a gurney or in a wheelchair just to undergo the treatments. I was down to 128 lbs, on oxygen support 24 hours a day, taking morphine to make the pain more tolerable and flat on my back.

I had exhausted over \$15,000.00 on natural remedies and nothing was helping my condition. I had knowledge of cancer fighting immune and stabilizing minerals and nutrients but the products on the market weren't doing the job.

Much alarmed at the dramatic loss of energy, vitality and overall well-being, I went on the Internet to do additional research on "Natural Cancer Cures". There I discovered breakthrough research done by a Dr. Mathias Rath. However, I could not find the nutritional formula he recommended anywhere. Then, a week later, as the universe will often provide when you ask, a friend from Thailand called me with a friend on the line from California with a supposed breakthrough nutritional formula. Imagine my surprise when he emailed me information on the very product ingredient formula I had been searching for. It is one of the subsets of a breakthrough liquid nutritional formula called 'VIBE'.

After only three weeks of using this formula I have my life back. I have already gained 15+ lbs and although I continue chemo I am back leading a normal life, off oxygen and morphine in just 5 days. I now not only drive myself to the cancer clinic and walk in for the treatments but I have also have been able to resume my tax and financial consulting business. I am very grateful for VIBE.

It is truly a remarkable break-through formula.

## **Flu - Stacy McRae**

Cherry Dawn and I walked three days in a row (four to five miles per day); I've been fighting this horrible cold thing that's going around; fighting some flu thing; and, to top it off the last two nights and days my body has hurt in my elbows to hands

horribly - just achy all day long. I got up and got ready this morning, lagging - I've been sleeping 7-9 hours per night, so I've been doing well about that.

But today my eyes were all red; left eye VERY red; right eye kind of pink (that usually means I'm not far from a migraine). Anyway, I took approx one ounce of VIBE and I feel so much better, ten minutes man. Anyway, my left eye is now pink and my right eye is completely clear. I know this is a strange thing to measure but it is immediate. I'm taking one more ounce in an hour and I expect all the redness to completely go away. WOWSIE! Go write that one down.

Before, I felt like S H \_\_ and now I'm feeling much better. Not perfect but about 50% increase in overall feeling good!

### **Recovery Gym - Frank J. Colli**

After using VIBE For Three Days the Discomfort in My Knees and Hands Is At Least 75% less, I also Have More Energy When I Awake In the A.M. , More Natural Feeling Energy during the Day, and I've increased My Reps and Weight while lifting At the Gym. I'm 14lbs lighter and Eat Less. I'm 12 Days into The Program.

### **Parkinson's - Jackie L.**

I have been diagnosed with Parkinson's for several years now. Parkinson's is caused by lower than normal levels of dopamine, which is produced by the brain. Cause of this problem is, as yet, unknown.

If I miss a dose of the Carbidopa/Levodopa medication, the tremors, pain, and stiffness render me pretty helpless. I can't drive, difficult even to eat with my hands trembling so much that the food usually falls off the fork before it reaches my mouth.

When I have had stomach flu in the past and cannot keep my medication down, I've been reduced to a trembling, dysfunctional mess. It takes days for the medication to build the dopamine levels back up in my system for me to be able to work, drive, live.

At some point, this Parkinson medication (Sinemet) becomes ineffective for nearly everyone who takes it. The strategy is to take as little as you need to get by, so that it will be effective over a longer period of time. My normal dosage was 1 tablet about 4 times a day. But, I do not take it by the clock. I take it at the first sign of the tremors. In that way, I sometimes only need to take 3 tabs a day.

With Parkinson's, there is no cure. All that can be done at this point in time is to suppress the symptoms.

I began to take VIBE, 1 ounce twice a day, during the first week of January, 2006. For a few days, it seemed to me that the Sinemet was not working as well as it normally did. I was experiencing some tremors, even when I was taking the medication. That had never happened before. I wondered if there might be something in VIBE that was counteracting the Sinemet. I know that proteins and some B vitamins may affect the action of the medication. I wanted to give VIBE a fair try, so I pressed on.

One day, about the middle of January, it suddenly struck me that it was nearly nightfall, and I had not needed to take any Sinemet, because I had experienced no tremors. I kept holding my hands up in front of my face to see if they were shaking. They were not. I have to say that this came as quite a shock to me. I was expecting to see some health benefits from using VIBE, but I never even thought my Parkinson's symptoms might improve or disappear.

I decided to continue with VIBE, taking between 2-3 ounces per day. I decided not to take any more Sinemet unless the tremors would force me to. A few evenings after that day, I began to experience some mild tremors. Rather than reaching for the Sinemet, I took an ounce of VIBE. Within 5 minutes, the tremors were gone.

It is now February 11, and I have experienced zero Parkinson's symptoms since the middle of January. I have also taken none of the Parkinson medication. For me, this is "HUGE"!!

I saw my neurologist (Parkinson doctor) on February 7 to tell her what was happening with me. To say she was very pleased is an understatement!

I told her about my experience, she examined me, and found no evidence of the Parkinson's symptoms. I brought her VIBE brochure, a CD, some VIBE samples, Dr. Burba's phone number. She was looking over the ingredients in the brochure as I spoke with her. She wondered out loud if there might perhaps be an ingredient in VIBE that may mimic the dopamine provided by the Sinemet. Or, she wondered if there might be something in VIBE which might be prompting the brain to produce more dopamine, bringing it to more normal levels.

She said that something like this might become a good supplement for newly diagnosed Parkinson's patients to try who desire natural remedies, as opposed to chemicals in medication, along with their side effects. Some of her patients wanted to supplement the lack of dopamine in their systems by using foods which are known to contain some amounts of dopamine, like fava beans. But, she said it was too difficult to do, since the amount of dopamine in foods is so variable. She thought that it may be better to use something like VIBE, where the ingredients are more standardized, to achieve and maintain the correct amount.

She was wondering all these things aloud, and she said that she would check it out.

The end of my testimonial... The beginning of something I never thought would be possible...life without Parkinson's symptoms and life without Parkinson's meds...

### **Pain - Bobbie... From Oregon**

I got a call from a good friend in December about VIBE. I have for 35 years always looked for the "good things" in natural health products. I am nearly 70 and been blessed for the most part with good health except for a serious intestinal problem when I was younger, which I finally learned how to heal myself. Sometime ago I hurt my arm, it healed but as I got older it began to really hurt in the elbow. Got so bad I couldn't lift a cup, it wouldn't bend up to my shoulder and wouldn't straighten all the way out...every morning when I got up this arm hurt so bad, I would get in the shower and run very hot water over it and then slather it up with a natural pain relieving cream. I did this several times a day with the cream, helped some, but nothing great, still couldn't use my arm....Long story short.....3 days after I started VIBE at one once a day...I noticed that when I got up in the morning my arm didn't hurt, no pain, a couple days after that I could straighten it all the way out, and also bend it up to my shoulder, no pain. I can't tell you how many vitamins of one sort or another and lotions and potions I took to help this problem, nothing I did made a difference.

When I got VIBE I quit taking all other vitamins and said I would give it an honest try...My arm is back to normal and another benefit is that my energy level has gone thru the roof and since I have increased my VIBE to 2 ounces a day.....a chronic back pain I have had for years is totally gone. I feel like a new person and I will be forever grateful to my friend in New York who thought enough of me to share it with me, it has truly changed my life.

Since that time I have now ordered other things like the protein and the omega 3's...KNOWING I am getting the best there is out there.

### **Insulin Dependent Diabetic - Tom Foy - Atascadero, California.**

The one testimonial I think that would impact a lot of people is my good friend, Tom Foy. Let me give you just a little back ground. I've known Tom for about twelve (12) years; he used to work for me as my "Sales Manager". He first introduced my wife and I back in October, last year.

Tom has been an Insulin Dependent Diabetic for over forty (40) years. His feet and legs were so bad that his Doctor (of 25 years) had told him that amputation was inevitable. He had NO feeling in his feet for over ten (10) years and walked with tremendous effort with a cane. He was first introduced to VIBE by a friend (retired Nurse) and after taking it twice a day for two (2) months; his legs were back to normal. A couple of weeks after that and he once again had feeling back in his feet.

His Doctor had told him that his "Diabetic Neuropathy" was irreversible. Boy was she surprised when he went in for his checkup. Not only was she amazed to see Tom walking normal, but when he removed his shoes and socks, it completely blew her away.

**Fibromyalgia - Kendra**

ME...I am a 40 year old woman that has been Fibromyalgia free for about 6 - 7 years now due to other nutritional supplements. I was hesitant to try something new as the other products were working for me.

Because I deeply trust the man who sent me the information, I decided to check it out. I was impressed with the 71/2 minute call and had to give VIBE a chance. To me it just made sense!

I noticed a difference within the first hour. 15 minutes after taking VIBE, I felt a tingling in my arms, then down my legs and then in my tongue. Within the hour my head was clearer and it felt as if my vision was enhanced. Weird I know but true. I had more energy and slept soundly that night, waking up feeling refreshed instead of still tired.

On my sixth day of taking VIBE I noticed that my constant pain in my left foot had stopped. I broke my foot 20 years ago and it has caused me grief ever since. NO MORE! J

Day eight brought relief from hip pain which has been plaguing me for the past year to the point where sleep was interrupted.

2 weeks marked a significant loss in fat! I go to Curves where they weigh and measure you once a month. I had been measured late due to Christmas (and my lack of participation during that season). Within two weeks of taking VIBE, I had a loss of 10 inches total body! I was truly impressed.

I notice that my craving for sweets is greatly decreased.

I look forward to VIBE and water each morning. This product is truly a gift from God. I am excited to be able to share it with everyone! Excited about VIBE!

**Energy - Dawn Barnett C, Arizona**

I think the myth is you have to have some debilitating disease in order to really see the benefits of VIBE. I believe you just have to have the desire to feel great! I was tired, stressed out and just didn't feel well. It wasn't anything life threatening. I would come home from work, barely feed my family dinner and then just want to climb in bed and watch TV. I had no energy to do the fun things in life. I had been

going to a homeopathic physician for years. Even though he recommended several wonderful multi-vitamins, they always made me feel nauseous. I would take them with food, before eating, just after eating, it didn't matter. Then a friend of mine ordered a bottle of VIBE for me. I really didn't want it but she was insistent that I give it a try. I couldn't believe how quickly I began to feel better and with NO negative side effects. I didn't feel nauseas, shaky, etc... I just felt GREAT!

Within days, I had energy I hadn't felt in years! It literally changed my life!!! Now, my whole family, extended family, friends and coworkers all take VIBE! I want to thank everyone involved in bringing such a great product into our lives!!!

### **Energy, Memory Improvement - Nathan**

My experience with VIBE has not been so long i.e. about a month. The very distinct thing I think I have noticed is that my resting time over about 2 weeks was reduced from 2.5-3 hrs a day to half an hour to forty five minutes a day. These are rejuvenation naps in the afternoon. This is quite significant as I have been recovering from Open Heart Coronary Heart Surgery Aug. 31. Now it is Feb.12. It may be true that normal recovery reduces the need for afternoon resting, however since using VIBE for a week the reduced resting time went from 2.5 -3 hours to 1.5 -2 hours and after about 2 weeks to half an hour to forty five minutes. Usually throughout the day I was quite fatigued on and off as well.

Recently since using VIBE I do not notice hardly any fatigue at all and am daily amazed at that. My memory and thinking / concentration have also improved a lot. Personally, I really think VIBE is an excellent drink. My skin is better and the energy in my hands and feet is also better. Hope I can continue using it!

### **Cramps in my legs - Cherry L**

I have suffered for a number of years with cramps in my legs and feet in the middle of the night. After just 2 weeks on VIBE, I noticed I was sleeping all night with no cramps. I haven't had a leg cramp since.

I also had a very sore thumb joint on my right hand, it got so that I didn't want to do anything that I had to use my thumb for. It took a little longer, but that pain, too; is totally gone.

Thanks for VIBE.

### **Energy and "Happy Feeling" - Amy T, Los Angeles**

I've been on VIBE for 4 days so far. Within the first minute of taking it I felt something good, but different going on inside the core of my body. I didn't even know that much about it but I trusted my friend's advice in taking it. After 10 minutes I felt my mood shift to a subtle an "I'm so happy" felling, then I got a huge surge of energy unlike a chemically induced kind. I felt totally present and focused
