

**TESTIMONY: KEMIS RODGERS** I have suffered with sarcoidosis for 35 years, but it has not really bothered me until fairly recently, when it became harder and harder to breathe. Many people get over this disease easily because it goes away by itself. About 5% of us have complications, which cause other difficulties and even death. In my case it has caused fibrosis (scar tissue) of the lungs, which is intertwined with my air passages, and breathing has become extremely difficult. In spite of not wanting to do so, I was forced to go on prednisone in order to stay alive. I gained 45 pounds, but my breathing came easier so, with the help of 24 hour oxygen, I was able to get around. However, I was very feeble, could only walk a very short distance, like from the house to the car, and could not lift, or bend over or do chores. It resulted in great shortness of breath just to get dressed. I was extremely weak, could not read out loud and lost all interest in doing what I loved most (watercolor painting). Everything was an effort.

Then a friend introduced me to VIBE. She explained that it is super nutrition that goes immediately to the cell, bypassing digestion, so it delivers about 90% of what is ingested and works quickly. The first day I took 1 ounce of VIBE and noticed I had very little heartburn (which was unusual for me). On the second day, I had none at all. WOW! I was so encouraged by this that on the third day I took 2 ounces. My heartburn never came back and on day 8 of being on the VIBE I awoke in the morning with a burst of energy and renewed strength. My depression was gone. Now, I had not been able to walk farther than from the car to my kitchen, and that was an effort. Suddenly I was able to breathe better, work with less effort, and best of all I could walk better and longer. That day I walked ¼ of a mile, which I had not been able to do for at least three years! No one could believe it. My husband came outside and could not find me. He thought I must have fallen or something, but I had walked up our steep driveway and down the road. He was absolutely astonished.

I continue to have the energy to do most of my chores My weakness is all gone. Fatigue has not been a problem since beginning the VIBE.

When I went to my doctor the next time she kept saying "Is this the same woman?" She noted that my complexion was rosier and of course, was surprised at how well I was doing. In fact, she called all of the office help out to look at me, since they were aware of how I had been previously. The doctor is now recommending VIBE.

VIBE is an adaptagen and goes into the cell by osmosis because it is 4 times smaller than the cell. It travels first to what the body needs most. They say that the longer you use it, the better it gets, and after what I have experienced, I believe it. This concentration of everything your body needs helps our cells repair. It is the latest technological discovery to make up the health deficit left by depleted soils and processed food in our diet.

## Autism

Hello, my name is Tanya Eckert. I have some wonderful news about our product and someone very special to me. My 5 yr old son Dustin.

Dustin was diagnosed with Autism when he was 2 years old. Very bright in many area's. But on the Doctors chart he was scored at being only 12-18 months, until he was almost 4, the last time he was checked or "scored". Ok I'm getting ahead of myself. Dusty was unable to speak at 2 yrs old, at 3 years he only babbled as a 8-12 month old baby, just before he turned 4 he started talking a little. But mostly you could not understand him, unless you were with him a lot. He learned to use basic sign language for his needs to be met.

Recently I have started him on the adult VIBE and what a difference! He talks so you can understand almost everything he says. He is talking in complete phrases and they are in context to what is being said or what's going on. He has also been reading books and everything he see's. He is sleeping better, using more eye contact and he is now very affectionate (which he NEVER was). Now he will come up to me, all on his own and say "Mommy I love you" and gives me a hug. You have no Idea how long I have prayed and waited for this day to come, to hear those words from my little man.

His teachers, my parents, family and friends have all noticed the difference in him. He has only been taking the VIBE for 2 weeks and the difference is unbelievable! I cant wait to see what happens in a month or two.

I have seen the difference this product makes right here at home and heard of many more wonderful differences it has made at homes around the states.

This product (VIBE) is wonderful and as far as I am concerned Heaven sent, I would love for everyone who has the chance to try this product, to try it and see the difference it can make in your life too!!!

I'm very Proud,  
Thank you,  
Tanya

## **Stomach Cancer - Wayne N**

I was diagnosed with stage four stomach cancer in June of 2004. I have always been one to explore and use the nutritional path for health and have outlived the 6-9 month life expectancy given to me upon diagnosis. I guess you could say it's ironic that I would be diagnosed with this catastrophic illness with my belief in natural remedies. It seems that over the years such things as addiction to latte's & espressos, coupled with my eating lifestyle produced a very acidic environment internally.

I was very reluctant to go the radiation and chemo route. However, I found I was losing the battle with cancer and started radiation still hoping I could beat this by natural remedies. As a last resort I agreed to Chemo when my lymph system shut down completely, flooding my organ areas with excess fluids. Between not eating and the chemo, I was so weak I had to be wheeled on a gurney or in a wheelchair just to undergo the treatments. I was down to 128 lbs, on oxygen support 24 hours a day, taking morphine to make the pain more tolerable and flat on my back.

I had exhausted over \$15,000.00 on natural remedies and nothing was helping my condition. I had knowledge of cancer fighting immune and stabilizing minerals and nutrients but the products on the market weren't doing the job.

Much alarmed at the dramatic loss of energy, vitality and overall well-being, I went on the Internet to do additional research on "Natural Cancer Cures". There I discovered breakthrough research done by a Dr. Mathias Rath. However, I could not find the nutritional formula he recommended anywhere. Then, a week later, as the universe will often provide when you ask, a friend from Thailand called me with a friend on the line from California with a supposed breakthrough nutritional formula. Imagine my surprise when he emailed me information on the very product ingredient formula I had been searching for. It is one of the subsets of a breakthrough liquid nutritional formula called 'VIBE'.

After only three weeks of using this formula I have my life back. I have already gained 15+ lbs and although I continue chemo I am back leading a normal life, off oxygen and morphine in just 5 days. I now not only drive myself to the cancer clinic and walk in for the treatments but I have also have been able to resume my tax and financial consulting business. I am very grateful for VIBE.

It is truly a remarkable break-through formula.

## **Flu - Stacy McRae**

Cherry Dawn and I walked three days in a row (four to five miles per day); I've been fighting this horrible cold thing that's going around; fighting some flu thing; and, to top it off the last two nights and days my body has hurt in my elbows to hands

horribly - just achy all day long. I got up and got ready this morning, lagging - I've been sleeping 7-9 hours per night, so I've been doing well about that.

But today my eyes were all red; left eye VERY red; right eye kind of pink (that usually means I'm not far from a migraine). Anyway, I took approx one ounce of VIBE and I feel so much better, ten minutes man. Anyway, my left eye is now pink and my right eye is completely clear. I know this is a strange thing to measure but it is immediate. I'm taking one more ounce in an hour and I expect all the redness to completely go away. WOWSIE! Go write that one down.

Before, I felt like S H \_\_ and now I'm feeling much better. Not perfect but about 50% increase in overall feeling good!

### **Recovery Gym - Frank J. Colli**

After using VIBE For Three Days the Discomfort in My Knees and Hands Is At Least 75% less, I also Have More Energy When I Awake In the A.M. , More Natural Feeling Energy during the Day, and I've increased My Reps and Weight while lifting At the Gym. I'm 14lbs lighter and Eat Less. I'm 12 Days into The Program.

### **Parkinson's - Jackie L.**

I have been diagnosed with Parkinson's for several years now. Parkinson's is caused by lower than normal levels of dopamine, which is produced by the brain. Cause of this problem is, as yet, unknown.

If I miss a dose of the Carbidopa/Levodopa medication, the tremors, pain, and stiffness render me pretty helpless. I can't drive, difficult even to eat with my hands trembling so much that the food usually falls off the fork before it reaches my mouth.

When I have had stomach flu in the past and cannot keep my medication down, I've been reduced to a trembling, dysfunctional mess. It takes days for the medication to build the dopamine levels back up in my system for me to be able to work, drive, live.

At some point, this Parkinson medication (Sinemet) becomes ineffective for nearly everyone who takes it. The strategy is to take as little as you need to get by, so that it will be effective over a longer period of time. My normal dosage was 1 tablet about 4 times a day. But, I do not take it by the clock. I take it at the first sign of the tremors. In that way, I sometimes only need to take 3 tabs a day.

With Parkinson's, there is no cure. All that can be done at this point in time is to suppress the symptoms.

I began to take VIBE, 1 ounce twice a day, during the first week of January, 2006. For a few days, it seemed to me that the Sinemet was not working as well as it normally did. I was experiencing some tremors, even when I was taking the medication. That had never happened before. I wondered if there might be something in VIBE that was counteracting the Sinemet. I know that proteins and some B vitamins may affect the action of the medication. I wanted to give VIBE a fair try, so I pressed on.

One day, about the middle of January, it suddenly struck me that it was nearly nightfall, and I had not needed to take any Sinemet, because I had experienced no tremors. I kept holding my hands up in front of my face to see if they were shaking. They were not. I have to say that this came as quite a shock to me. I was expecting to see some health benefits from using VIBE, but I never even thought my Parkinson's symptoms might improve or disappear.

I decided to continue with VIBE, taking between 2-3 ounces per day. I decided not to take any more Sinemet unless the tremors would force me to. A few evenings after that day, I began to experience some mild tremors. Rather than reaching for the Sinemet, I took an ounce of VIBE. Within 5 minutes, the tremors were gone.

It is now February 11, and I have experienced zero Parkinson's symptoms since the middle of January. I have also taken none of the Parkinson medication. For me, this is "HUGE"!!

I saw my neurologist (Parkinson doctor) on February 7 to tell her what was happening with me. To say she was very pleased is an understatement!

I told her about my experience, she examined me, and found no evidence of the Parkinson's symptoms. I brought her VIBE brochure, a CD, some VIBE samples, Dr. Burba's phone number. She was looking over the ingredients in the brochure as I spoke with her. She wondered out loud if there might perhaps be an ingredient in VIBE that may mimic the dopamine provided by the Sinemet. Or, she wondered if there might be something in VIBE which might be prompting the brain to produce more dopamine, bringing it to more normal levels.

She said that something like this might become a good supplement for newly diagnosed Parkinson's patients to try who desire natural remedies, as opposed to chemicals in medication, along with their side effects. Some of her patients wanted to supplement the lack of dopamine in their systems by using foods which are known to contain some amounts of dopamine, like fava beans. But, she said it was too difficult to do, since the amount of dopamine in foods is so variable. She thought that it may be better to use something like VIBE, where the ingredients are more standardized, to achieve and maintain the correct amount.

She was wondering all these things aloud, and she said that she would check it out.

The end of my testimonial... The beginning of something I never thought would be possible...life without Parkinson's symptoms and life without Parkinson's meds...

### **Pain - Bobbie... From Oregon**

I got a call from a good friend in December about VIBE. I have for 35 years always looked for the "good things" in natural health products. I am nearly 70 and been blessed for the most part with good health except for a serious intestinal problem when I was younger, which I finally learned how to heal myself. Sometime ago I hurt my arm, it healed but as I got older it began to really hurt in the elbow. Got so bad I couldn't life a cup, it wouldn't bend up to my shoulder and wouldn't straighten all the way out...every morning when I got up this arm hurt so bad, I would get in the shower and run very hot water over it and then slather it up with a natural pain relieving cream. I did this several times a day with the cream, helped some, but nothing great, still couldn't use my arm....Long story short.....3 days after I started VIBE at one once a day...I noticed that when I got up in the morning my arm didn't hurt, no pain, a couple days after that I could straighten it all the way out, and also bend it up to my shoulder, no pain. I can't tell you how many vitamins of one sort or another and lotions and potions I took to help this problem, nothing I did made a difference.

When I got VIBE I quit taking all other vitamins and said I would give it an honest try...My arm is back to normal and another benefit is that my energy level has gone thru the roof and since I have increased my VIBE to 2 ounces a day.....a chronic back pain I have had for years is totally gone. I feel like a new person and I will be forever grateful to my friend in New York who thought enough of me to share it with me, it has truly changed my life.

Since that time I have now ordered other things like the protein and the omega 3's...KNOWING I am getting the best there is out there.

### **Insulin Dependent Diabetic - Tom Foy - Atascadero, California.**

The one testimonial I think that would impact a lot of people is my good friend, Tom Foy. Let me give you just a little back ground. I've known Tom for about twelve (12) years; he used to work for me as my "Sales Manager". He first introduced my wife and I back in October, last year.

Tom has been an Insulin Dependent Diabetic for over forty (40) years. His feet and legs were so bad that his Doctor (of 25 years) had told him that amputation was inevitable. He had NO feeling in his feet for over ten (10) years and walked with tremendous effort with a cane. He was first introduced to VIBE by a friend (retired Nurse) and after taking it twice a day for two (2) months; his legs were back to normal. A couple of weeks after that and he once again had feeling back in his feet.

His Doctor had told him that his "Diabetic Neuropathy" was irreversible. Boy was she surprised when he went in for his checkup. Not only was she amazed to see Tom walking normal, but when he removed his shoes and socks, it completely blew her away.

### **Fibromyalgia - Kendra**

ME...I am a 40 year old woman that has been Fibromyalgia free for about 6 - 7 years now due to other nutritional supplements. I was hesitant to try something new as the other products were working for me.

Because I deeply trust the man who sent me the information, I decided to check it out. I was impressed with the 71/2 minute call and had to give VIBE a chance. To me it just made sense!

I noticed a difference within the first hour. 15 minutes after taking VIBE, I felt a tingling in my arms, then down my legs and then in my tongue. Within the hour my head was clearer and it felt as if my vision was enhanced. Weird I know but true. I had more energy and slept soundly that night, waking up feeling refreshed instead of still tired.

On my sixth day of taking VIBE I noticed that my constant pain in my left foot had stopped. I broke my foot 20 years ago and it has caused me grief ever since. NO MORE! J

Day eight brought relief from hip pain which has been plaguing me for the past year to the point where sleep was interrupted.

2 weeks marked a significant loss in fat! I go to Curves where they weigh and measure you once a month. I had been measured late due to Christmas (and my lack of participation during that season). Within two weeks of taking VIBE, I had a loss of 10 inches total body! I was truly impressed.

I notice that my craving for sweets is greatly decreased.

I look forward to VIBE and water each morning. This product is truly a gift from God. I am excited to be able to share it with everyone! Excited about VIBE!

### **Energy - Dawn Barnett C, Arizona**

I think the myth is you have to have some debilitating disease in order to really see the benefits of VIBE. I believe you just have to have the desire to feel great! I was tired, stressed out and just didn't feel well. It wasn't anything life threatening. I would come home from work, barely feed my family dinner and then just want to climb in bed and watch TV. I had no energy to do the fun things in life. I had been

going to a homeopathic physician for years. Even though he recommended several wonderful multi-vitamins, they always made me feel nauseous. I would take them with food, before eating, just after eating, it didn't matter. Then a friend of mine ordered a bottle of VIBE for me. I really didn't want it but she was insistent that I give it a try. I couldn't believe how quickly I began to feel better and with NO negative side effects. I didn't feel nauseas, shaky, etc... I just felt GREAT!

Within days, I had energy I hadn't felt in years! It literally changed my life!!! Now, my whole family, extended family, friends and coworkers all take VIBE! I want to thank everyone involved in bringing such a great product into our lives!!!

### **Energy, Memory Improvement - Nathan**

My experience with VIBE has not been so long i.e. about a month. The very distinct thing I think I have noticed is that my resting time over about 2 weeks was reduced from 2.5-3 hrs a day to half an hour to forty five minutes a day. These are rejuvenation naps in the afternoon. This is quite significant as I have been recovering from Open Heart Coronary Heart Surgery Aug. 31. Now it is Feb.12. It may be true that normal recovery reduces the need for afternoon resting, however since using VIBE for a week the reduced resting time went from 2.5 -3 hours to 1.5 -2 hours and after about 2 weeks to half an hour to forty five minutes. Usually throughout the day I was quite fatigued on and off as well.

Recently since using VIBE I do not notice hardly any fatigue at all and am daily amazed at that. My memory and thinking / concentration have also improved a lot. Personally, I really think VIBE is an excellent drink. My skin is better and the energy in my hands and feet is also better. Hope I can continue using it!

### **Cramps in my legs - Cherry L**

I have suffered for a number of years with cramps in my legs and feet in the middle of the night. After just 2 weeks on VIBE, I noticed I was sleeping all night with no cramps. I haven't had a leg cramp since.

I also had a very sore thumb joint on my right hand, it got so that I didn't want to do anything that I had to use my thumb for. It took a little longer, but that pain, too; is totally gone.

Thanks for VIBE.

### **Energy and "Happy Feeling" - Amy T, Los Angeles**

I've been on VIBE for 4 days so far. Within the first minute of taking it I felt something good, but different going on inside the core of my body. I didn't even know that much about it but I trusted my friend's advice in taking it. After 10 minutes I felt my mood shift to a subtle an "I'm so happy" felling, then I got a huge surge of energy unlike a chemically induced kind. I felt totally present and focused

yet incredibly creative. I'm not over weight in any way but I did lose 3 Lbs. in 4 days. I've spent a small fortune on trying products from friends, colleagues and research that just never do what they claim they are suppose to do and what you are paying for them to do. I don't think in my life of trying products that I've EVER felt anything work so fast! I thought this was going to be another one of those but something inside of me said this is different. I couldn't sleep for a whole night just thinking of all the people I was going to tell about how great this product is! I'm so thankful for this product!! It says exactly what it will do and then some!

### **Serious health condition - Tony F**

My name is Tony Flanagan and I live in Northern Ireland, I was introduced to this product in November 10, 2005, I was living with a very serious health condition which had very serious consequences for me.

I was searching about for an alternative approach to my condition, knowing that out there somewhere and with much prayer I would find what I needed. I was on quite a few medications that were causing many undesirable side effects, so to cut a long story short I came across a doctor lady in your fine country and she told me about VIBE product, I knew instinctively that I had to go for this, I ordered my bottle and box and couldn't wait until it arrived to see if this was what I was searching for it eventually arrived and I took an ounce straight away, at first I didn't feel anything different as some people have experienced and it took about a week before I started to notice little things, I started to detox slightly with going to the toilet more frequent and also I felt more energy and my skin started to feel smoother, after another few weeks I noticed my energy levels increasing so much to the extent that I decided to try and reduce my medication and see if I would notice any difference, any how I am now down to minimum dosage less than half that I was on and I have been checked and all my readings are normal my doctor didn't notice any difference and when I told him he was surprised.

Any how I am now at one third of what I was on initially and I intend in the very near future to stop medication completely, I feel great, my skin feels great, I can walk and climb without much discomfort, I also know its early days and I know I am going to feel much better as time goes on and I continue with this amazing mixture. I want to thank everyone I have talked to and I hope everyone gets similar encouragement and vitality as I have, god bless and I will spread the word.

### **Pain - Anna L**

I recently suffered severe pain in my right wrist which radiated up to the base of my skull and I was not able to pick up a tray of ice out of the freezer without dropping it. I took 1 oz of VIBE and the pain disappeared within 20 minutes and I could pick up the ice tray within 30 minutes. This was in September 2005. Since then I have been taking VIBE 2 ozs per day and have had no pain and am able to use my right hand freely.

Also I had to check my system for sugar levels for the past 16 years and since I have been using VIBE I have been able to stabilize my sugar level to 110-120. Even when I cheat and have some (small portion) delicious triple chocolate cake (my favorite) I take 1 oz of VIBE when I do this and it seems I don't suffer a sugar spike.

Also as a woman of 50 going through change in life I have found that VIBE has helped me with eliminating my hot flashes and the pain is minimal to none .WOW I am not taking any medication for any of my health challenges and all my life I have always looked for natural methods to heal ones body. Thanks to VIBE I can stop looking. Because of the natural properties in VIBE I have found it to be the best.

### **Pain - Doug**

I had a lot of pain in my left ankle and at work I'm on my feet most of the day. The only way I could make it through the day was to take Celebrex.

One day my doctor said he was no longer going to allow me to take it which had me pretty scared, because without Celebrex the pain was crippling. I had already been on VIBE for a couple months and never realized until I stopped the Celebrex that I no longer needed it anyway. VIBE had already taken care of my problem.

### **Weight Loss (15lbs) - Larry E**

I actually was in pretty good health when I started taking VIBE so I didn't have any hundred and eighty degree turns around when I started taking it. I have been on VIBE for about 4 months now and there have been some subtle things going on with me like in Dec. I started to get the flu so I doubled up on my VIBE and it was gone in 24 hours and the only other thing that I can say about VIBE is that I let myself run out before my next order came and I sure could tell a difference in the way I felt because it was about a week that I was out of it and I like some others on the testimonials email said, I will never let myself run out of it again. I have lost about 15lbs. without changing anything about my eating habits so I know it has to be VIBE.

### **Asthma - Catherine W**

Hi, I'm Catherine Wolfe and I have asthma. I have been taking 1 ounce of VIBE a day for about 6 weeks and have been off my asthma medication (for the first time in 25 years) for 4 weeks.

Last Monday, I walked briskly down the hill to our mailbox and back (1/4 mile) in 40 degree weather WITHOUT WHEEZING. This was a FIRST for me and I'm just thrilled! Even when I was taking asthma medication daily, I still would wheeze and

have to use my rescue inhaler when exercising and especially in cold weather. Go VIBE!!!

### **Blood Pressure – Judy D**

I am just about through two months of VIBE - I was skeptical at first because I have always taken a lot of supplements and had thought they were "keeping me together" quite well. However there have been so many wonderful changes in my health that I have to give VIBE the credit. My blood pressure is fantastic and I have lost 5 lbs without trying. My aching hips have improved drastically and my energy level is up. I am also sleeping well, which I haven't done in years. I'm 65 and raising my 5 year old grandson - alone! I'm just about to place an order for more VIBE, and have passed on the information to some close friends and family, who I believe should try it too. I have no hesitation in recommending this product - I've tried it and it works - well!

### **Multiple Sclerosis - Lynda D; New Mexico**

9 years ago I was diagnosed with M.S. I used to be a ballet dancer and now I couldn't walk, was wheel chair bound, also had total blindness in left eye. I changed my diet per Dr. Burba, plus supplements and was walking in 6 weeks after not walking for 6 months. My husband passed away a year and half ago causing great stress on me. This past year my balance and energy started dwindling and to make a long story short....2 weeks on VIBE and I not only have more energy and balance than I've had in years but I'm dancing ballet again, and I'm also teaching ballet again.

### **Diabetic Loosing Weight**

As someone in the herbal business for decades, I was still having some physical problems that defied all my attempts to help. I've had heart surgery in 1958 and a stint implant in 2004, plus a mini-stroke in 2002. I am diabetic and overweight. My exercise plans just seemed to fizzle every time I tried - no energy, or much pain. Walking was getting to be a real chore, which scared me.

After 3 days on VIBE, I was able to go up and down the 4 stairs into my home without even holding on, which shocked me.

Within a few more days, I started using the rebounded and exercise bike. About 6 weeks later, I began a serious walking AND bike riding program. I could not walk a block 4 months ago - now I can walk 8-12 blocks. I ride the bike for half an hour or more - I could not manage 5 minutes before VIBE! I sleep better. I am calmer and less stressed. I have far less pain anywhere in my body, especially from the neuropathy in my feet - the pain is almost totally gone. I'm losing weight - effortlessly, too!!

### **Changed my life - Linda Y; Kissimmee**

At 61, I'd given up on ever finding ANYTHING that could accomplish these miracles, though I've always taught "Give your body what it needs, and it can and WILL repair itself." VIBE is what it needed. I've been on it 4 months now, and have never taken more than one ounce a day, except on 2 brief occasions. It has changed my life and my future. I am so grateful!

### **Energy and Staying Power - Jean G**

One of the men at work got me started on VIBE. After being on it about a week, I forgot to take it and had to call him and ask him to bring me some as I was so tired. He brought it and I perked right up. I have been on it for about 2 months and I can work a LONG day and not be tired. I am 73 years young and get up between 3:30 and 5:00 daily and work a long day until 10 or 11 at night. People ask me how I do it. I tell them VIBE. I am going to get my daughters started on it. They don't know what they are in for. THANKS to VIBE!!!

### **Flu - Dhyana B**

A friend was staying in my house and brought a one oz. sample of VIBE home for me to try. I hadn't been feeling well for about 3 months, having gotten flu around the end of September after traveling, that I felt like I never completely recovered from and had to continue fighting off, in spite of all the natural remedies I was taking that generally work. I was in a definite energy/health crisis and just barely making it through my workday, coming home too exhausted to do anything in the evening. So I took the sample that morning with some food, didn't notice anything in particular that day, but the next morning I woke up early and was filled with clear, vital energy like I hadn't felt in a long time. Instead of wanting to linger in bed as long as possible, I found myself up and cleaning the house and getting to all kinds of projects that were long overdue. I felt great and the positive effect was very noticeable! I took my second sample that day and again felt good and enjoyed sustained energy throughout the day, and a feeling of wellbeing and aliveness. The following day I didn't have any and I felt tired again and really missed it! Naturally, I couldn't wait to get more. I've now been taking VIBE for about 2 months and continue to be grateful and amazed at the potency of VIBE. My general health continues to improve and a chronic tendonitis in my wrist has disappeared. My digestive system is functioning really well (I'm also taking their Probiotic) and I've been able to put on weight and keep it on, for the first time in years, bringing me to my ideal weight. I'm very excited about these products and the opportunity to help others with them, and consider VIBE to be the best and most powerful liquid nutrition available.

### **Cholesterol - Ellen PA**

I started using VIBE in November of 2005 and I had to get my blood work done on December 16, 2005. The Doctor insisted that I get my cholesterol checked this year again because my LDL has been on the High level for quite a few years. My ratio has always been within range though. I called the nurse for my blood work results and she was asking me questions that were confusing me and scaring me. She asked me if I was on Cholesterol medication. I told her, NO, and then she told me how great my numbers were. My LDL had dropped from 141 to 119. She asked me what I was doing. I laughed and said, "Well, I know it's not from diet or exercise since neither of those have changed" I'm still overweight and have a poor diet. It must be VIBE!!! I wouldn't have believed it myself had I not seen the numbers staring me in the face. All I can say is, even if you aren't feeling anything on the outside, It IS working on the inside. Go VIBE!

### **Chemo and Radiation – Lynette**

I recently had a remarkable experience with VIBE. A dear friend is recouping from major chemo and radiation. I went to see her and she seemed like a wounded animal in a cave. I asked if she would give VIBE a try and she agreed. Within 15 minutes, she was sitting straighter and said, "Oh my, a sense of well being, I haven't had that in 6 months." She was bent over and shuffling when I arrived. Within 1 ½ hours she strode to the door with me.

She called me the next day saying I and VIBE had saved her life. She was experiencing some detox, but knew that was what it was. The next day she called asking me to participate in a festival with her in June. The change was quite dramatic. I am so happy to share VIBE!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!

### **Pain – Terry R**

Here is my testimonial about VIBE. I hurt my back about 3 years ago at work. Several months ago I started taking some supplements that helped to reduce my back, hip, leg, foot pain and numbness about 80%. I still had some of this going on. When I started taking VIBE the rest of the pain went away in about 2 weeks. I would say that I am at about 99% now. My energy level is better. My mood is better. I am also going to try some of the other products too. VIBE is great, but we need keep in mind some of the other products have some of the same technology as VIBE and more concentrated for specific needs. These can also help to get our BV requirements for the month too.

### **Creaky Joints – Randi**

We are having great results with VIBE. My creaky joints have stopped creaking and I have a lot more energy and mental focus. Tom loves it too and I have several friends who would like to order. I am high on VIBE!

## **Feel Better – Jana Cloud-B, San Leandro CA**

My testimonial is that I FEEL better, more energy and feel VIBE-BRANT when I am taking VIBE, recently, I traveled and gave out many packets so I had two days with out VIBE. Well, I will NOT be doing that again, Ill share but, I will make sure I don't torture my self. The other Thing is that my husband who takes supplements fought it for a month, he finally, On a low energy day he took some-now he knows the difference. He swears by It and has started giving out MY packets to his friends and associates. Lastly, my Children love it. Just a half dose or a capful and they ask for it with out complaint like the regular vitamins. It works - that is my testimonial

## **Pain-Charlie & Meth B.**

This is our testimony: In Dec.2005 my husband was in severe pain from his knee to his hip from an old ski accident and what he thought was a colon block. He had horrific pain in his lower back and when he tried to turn over in the bed to get some relief, he even screamed out and would wake me. A good friend of ours that lived about 40 miles from us had called and told us about VIBE a few weeks before. We drove to her house to taste it and maybe order some. She mixed us both VIBE and I tasted it and said, it tastes great and I want to order some ASAP. We went home with 6 sample packets of VIBE and I gave him 2 more oz. before retiring. We both slept all night for the first time in a while. Now, my testimony: I am a waitress in a busy one waitress Mom & Pop restaurant and I have scoliosis (spelling??) I have known that I had it since I was 10 yrs. old and I guess that I had just got used to the constant pain, sort of feels like a 24/7 toothache in the back!! Now, at the same time as my husband's condition, I thought I had developed a bone spur in my right heel. The Dr. gave me some (anti-inflammatory (Pills) and told me to stay off my feet! I said Easy for you to say. I'm a waitress... I went back after a week and the Dr. took 10 x-rays of my now swollen foot and ankle. And the x-rays showed nothing!! When our order of VIBE came in I started taking 2 oz a day on Christmas day. 5 weeks later we both were completely Pain Free!  
God Bless, Thanks, Meth & Charlie  
Focus On What You Can't Afford To Lose

## **Leukemia**

A little time back my Dad was diagnosed with a fast acting Leukemia Feb. 28th. Two weeks is what the Doctor told my Dad he had left. My Dad is a compassionate man, and the news just about did him in. Dad is 70 years old and he has many projects going and a new automotive design studio to building to build. We found out about VIBE from a friend that was recovering with the use of VIBE (2 oz. a day) from nearly having his foot amputated as he is suffering from Diabetes, before VIBE he lost the feeling of the bottom of his foot and the circulation was nearly gone in his foot, As of today he is doing much better, the foot has feeling. You see the VIBE product Oxygenates your blood supply and illnesses like cancer cells can't survive in an oxygenated environment. VIBE is not a cancer cure. It just does what it does, oxygenates your blood supply, just one oz. of Vibe a day, up to four oz. a day depending on your weight and health needs. My Dad is taking one oz. a day as of today (05-08-06) Dad is doing fine, his white count is rising, and he is just not ready to go. The Doctor was informed and he said to keep on taking VIBE. We found out about VIBE while we where in a full fledged PANIC, I hope to show this to as many people as I can, Please help me and pass this on, I would like to help save or help stretch a life of someone else's Dad, perhaps, before a full fledged PANIC. Thank You, Kevin.

**Since using VIBE**, I have had a tremendous surge in energy and also much improved sleep. Also, I have noticed a tooth abscess has gone down considerably, sparing me a large dental bill! I seem to get best results by swishing it around in my mouth for about a minute before swallowing. The vibettes are also a lifesaver for when I am at work and need the extra boost.

## **my entire anatomy has changed**

I have been using Vibe now for about a month. It seems my entire anatomy has changed in the course of thirty days. Vibe is a powerful product that incorporates the best of research, ingredients, and ideals. At present, I have only shared the experience I've had with a co-worker and my ex-wife and children. Now that may sound like a list of people that are looking for reasons that things are wrong, but it really has proven to me how well Vibe incorporates cellular regeneration. My former wife, and mother of my ten and eleven year old children told me about Vibe and her belief in the product was astounding. I am a forty-nine year old type one diabetic that had very unstable blood sugar

readings for a long period of time. I had been on vitamins and minerals for some time, and they had a positive effect but stress and lack of sleep was effecting me. In the last month I have been resting better, far more energetic after waking, and a healthier person all around. My blood sugar is far more stable, and I rarely feel the emotional degradation of worry. My tension levels are far less, my attitude has leveled to a positive place that it hasn't known all my life, and my physical stamina is greater than ever. I have also used Bio-Chlor for some time and have further incorporated health in my regimen. I'm a typical male, and fruits and vegetables look great on canvas, but I don't go out of my way to paint that picture. Bio-Chlor and Vibe together keep my digestive system in working order beyond recollection. I have not felt better, been more regular, more energetic and healthier. Vibe has also formed a new path for my children, who were on behavioral medications for a long time. They had been diagnosed with several problems, and of course, had been prescribed all kinds of medication. Once they started on Vibe, they were far calmer, had less resistance to working with their school projects, and their sleep patterns were very predictable. This is a new occurrence for both of them. Junior Vibe is the choice for my daughter, and although my son is only 16 months older, the adult version has helped him immensely. I am a constant customer, believe in the organization, and can only pray that Vibe's success is expanded though out the population more thoroughly.

Many thanks and keep up the good work.  
Cordially,  
Mike Reilly

**AUTO-IMUNNE PROBLEMS**

HI MY NAME IS MJ. I STARTED TAKING VIBE DEC 2005. I FELT BETTER AND HAD FEWER EFFECTS FROM MY AUTO-IMUNNE PROBLEMS. DUE TO THE COST OF VIBE I QUIT ABOUT 4 WEEKS AGO. I LOST ENERGY. STARTED HAVING PAIN IN MY LEGS, FEET AND ARMS AND THEN JUST ABOUT EVERYWHERE ELSE. I STARTED BACK ON VIBE LAST WEEK. I CAN NOT BELEIVE THE DIFFERENCE. I AM BACK ON MY FEET NO NAPS DURING THE DAY. AND FEEL ALL TOGETHER BETTER. I WILL NOT STOP IT AGAIN. THANKS VIBE  
MJ

**Sleep**

I started using Vibe January 2006. I noticed more energy right away and just felt much better overall. I had back surgery 8 years ago and since

that time I had not been able to sleep for more than 2 hours at a time. I woke up numerous times a night. I had a sleep study done and they said I woke up 310 times a night and did not ever get to rim sleep. All of this was very bad according to my doctor. I went on a machine to help me stop waking up at night but still was not sleeping well. Then, I started on Vibe. Right away I started sleeping all night and waking up feeling refreshed. I no longer had to take naps to get by during the day. Overall I felt like I was a new person. The additional energy was great, and combined with not being tired so much; I can get much more done during the day. I love this product and try to tell everyone I can about it.

Walt Childs

### **major stroke victim**

My testimonial is caused by incredible results obtained from using Vibe since Aug. of last year. Remember folk's, that wasn't over night!

I was a in 2001.

My blood pressure used to be around 165/105, without meds. It took 5 tablets to control it at 120/80.

After using Vibe since Aug. I decided to try loosing the meds to see if there were any changes. There was a small drop but not enough to write home about. I did some digging on the Eniva site for what to add next. POTASSIUM! Now you can hurt yourself by going overboard with Potassium so I carefully read the label. It said a 1 one ounce serving is about 17% of our daily need. I weigh 238 and loosing. I decided that 3 doses a day wouldn't over do it, but everyone is different, consult your physician first.

In 48 hours, pressure dropped to 121/84! I can live with that!

It has been 4 weeks without meds now and after being in the garage working with my table saw I went from the garage to my living room and slapped on the cuff. I don't think I rested more than 3 minuets. It came out at 121/87!

My next big break came at the VA hospital. In Aug. they checked my

eyes for vision and a detached retina.

Vision was clocked at 20/200, both eyes no glasses. You know, like where is the wall Doc?

About two weeks ago they did follow up. No sign of a detached retina. But check this out, vision was clocked at 20/32 L eye & 20/42 R eye, no glasses. I can now sit at my computer without glasses and read just fine, NO GLASSES!

I presently feel weird, like my head is being rewired or something. You see my left peripheral vision witch was 100% toasted in the stroke is now opening up! The input from the blind side is a little weird feeling. THAT'S FINE, I'LL TAKE IT!

When I HAD THE STROKE I also HAD CONGESTIVE HEART FAILURE WITH IT. Their tests this last time from the lab indicate I have almost totally recovered pumping action.

Just the fact that I have been able to drop my blood pressure meds and associated costs means my Vibe is FREE.

I believe by this time next year, I will be able to pass an FAA third class medical. That means I will be able to fly again. That means thousands of pilots will be encouraged to use Eniva products for themselves, because I will get the word out!

That means my flying will become DEDUCTABLE! I just love it when a plan comes together!

If I understand what I read, plus what Dr. Burba implied, my stroke was probably caused by excessive Coke & Pepsi consumption. I can truthfully say, things DON'T go better with Coke! LOL!

The soda destroys potassium content and that causes clotting of the blood if I understand it correctly.

I am looking forward to helping literally thousands of people with similar health challenges, in my remaining lifetime.

I also want to give the great healer, Jesus all the credit. He healed us all 2000+ years ago by his stripes.

I believe He inspired the creation of Eniva products to help get the healing job done.

That's my story for now with more success to come.

Regards,  
Ray Henry

### **Fibromyalgia**

Here is my testimonial.

I am 61 years old, a registered nurse. I have had Fibromyalgia for at least 15 years and have suffered from a great deal of pain all those years. I have taken many different kinds of vitamins and none really did much for me. So when my friend, Linda Yates wanted

me to try Vibe, I was very reluctant, and told her I didn't believe all the hype about yet another vitamin. It took her several months of hounding me before I caved in and said I would give it a 2-bottle chance, and if it didn't do anything more than the others, that would be the end of it. Knowingly, she agreed that that would be a fair trial.

The first week I didn't feel all that great, as I was detoxing. By the end of only the second week I realized that I had much less pain than normal. Within one month I had NO Fibromyalgia pain left in my body. Not only that, but I am sleeping like a baby for the first time in years. And I have more energy during the day because of sleeping better. I began telling friends about how good I feel, and they began to ask for Vibe themselves. My husband asked me to get him a bottle, though I had never asked him to try it, and he had never taken a vitamin in his life. He said he saw how much better I felt, and he wondered if it would help his arthritis pain. He is still on his first bottle, and his pain is getting less and less. It isn't gone yet, but he is happy with the improvement.

I am glad Linda kept after me, and I tell everyone about this wonderful product of vitamins and minerals that I take. I want everyone I know to try Vibe and derive the same benefits I have. Hooray for Vibe!!

Mary Lou Smith

**My irritable bowel problem is gone.**

I have been using Vibe for about 5 months now and I have never felt better. I have more energy and my irritable bowel problem is gone.

That in itself is worth the price of Vibe. I know that I am getting all the nutrients that I need and more. My skin, hair and nails have never looked better. I am 52 years old and when I am with my grandson, everyone thinks he is my son.....Thank you for introducing me to Vibe; it has made a significant difference in the way I feel.

Carol P. Demi

**Within a week I had my life back again**

I never thought I would have much of a life because I was very weak, could not stand more than a minute, and walking was out of the question. Severe pain in my legs, hips and back, Knees

swollen, no energy.

Just washing dishes was a chore I had to do by the numbers. Fill the sink with soapy water. Sit down and rest. Place dishes in water, sit down and rest, wash dishes, sit down and rest. You get the picture.

A friend introduced me to VIBE and after just three days I started to feel great. Within a week I had my life back again. Knees are normal, No more pain.

I now do things I thought was impossible.

I golf two times a week.

I have bought new fishing gear and am beginning to enjoy the outdoors again. I honestly feel young again with loads of energy.

I now have full nights of sleep and wake up refreshed with no aching pain as before. People who know me are amazed. I am diabetic and overweight but my sugar levels are much easier to manage and I have lost 19 pounds.

I have started an exercise program to begin getting my body shape back.

It is not possible for me to say thank you enough to the people responsible for developing this marvelous nutrition.

I am learning more every day about what has happened to the American people who are consumed with the thought that prescription drugs are the only answer to their dilemma. How utterly wrong they are!

I shall never stop telling everyone I meet about VIBE.

I am now a member of your team and I am looking forward to meeting you and others in Minneapolis/St Paul next month.

Mr. Jackie Minton, age 66

### **I feel better**

Vibe is the greatest nutritional multi-vitamin supplement in the market today, hands down. I have been a health nut for over 15 years now; I've taken every multi-vitamin 100% all natural pill out there, nothing compares to Vibe, NOTHING. Since I started taking Vibe, not only did it help me recover faster from pneumonia (5 days), I general have more energy and I feel better, I'm not as depressed and I have hopes for maintaining my weight loss goals thru Vibe. Thanks, Eniva for making such a wonderful product.  
Sincerely, Jeffrey Gouge

### **osteoporosis**

I am 70 years of age. In October of 2004 I was diagnosed with in my lower back (L1-4) and in my left hip.

As part of my health check up this year, the doctor wanted an

updated Bone Density Scan done. I received the results this morning and I am so excited I can hardly stand it.

My osteoporosis is reversing!

Bone density in my lower back has increased by 5.1% and in my left hip 10.9%. I have been on 2 ounces of Vibe and 3 ounces of Calcium water since November.

All women 50 and over have to take bone density seriously. In this day and age when there is very little nutrition in our food and you only have a 10% or less absorption rate from pills; liquid is the only way to go. I can hardly wait for my next bone scan next year to see the amount of increase in bone density.

I forgot to mention that I also take an ounce of Flex every day.

My doctor was so excited because he has NEVER seen bone density reversed.

I would like to add that his nurse asked me where to get these products.

Thanks, Eniva

Cherry Lewis
